

Adventures in Cardboard

Sword Kit Instructions

1. Tape the bamboo to the **inside** of one of the sword cut-outs—making sure the scoring is on the **outside**!

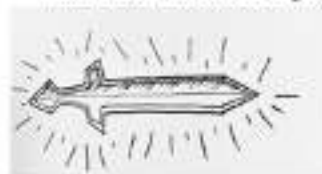

2. Place the second sword cut-out on top of the first, making a bamboo sandwich. Make sure the edges line up and that the scoring is on the **outside**!

3. **Pinch** the edges of the cut-outs together and **tape** along the edges.

4. You have successfully created an Adventures in Cardboard sword! If you wish, cut out cardboard details and tape them to the sword to decorate. You can also papier-mâché the sword to strengthen it!
